

# IQ Portfolio Insight

Monitor and manage data across federated organizations and systems and deliver trusted, up-to-date information for your decision-makers

## Who Benefits?

InQuisient's IQ Portfolio Insight benefits leaders and team members across the organization, including:

- ✓ Agency Leadership
- ✓ IT Portfolio Managers
- ✓ Program Managers
- ✓ Project Managers
- ✓ CIOs, CTOs, PMOs, and COOs
- ✓ Chief Business Investment Officers
- ✓ Data Analysts
- ✓ PEO Leaders

Gartner describes today's world as a "tsunami of change" that is engulfing every aspect of the IT Portfolio Management disciplines. Modern IT Portfolio Managers only think what they are doing is portfolio analysis, but business leaders are demanding much more. The increasingly distributed ownership of technology across the organization will inhibit the organizational leaders' ability to make timely and accurate decisions about IT investments, with much of the blame cascading down to the Portfolio Manager. The current disconnect between strategic goals and getting the right projects started will be exacerbated by the amount, types and rate of change occurring across the organization, distorting views and results reported by Portfolio Managers. Lack of sophisticated and smart IT portfolio management tools will constrain Portfolio Managers from meeting business expectations for better analysis.

IQ Portfolio Insight can help. Working on top of the InQuisient Platform, IQ Portfolio Insight helps organizations focus on enhancing the collaboration, communication and resulting IT portfolio-level reporting needed to gain first-line visibility into IT demand, project status, resource capacity and utilization, and cost estimates versus actuals. This technology enables you to track, review and analyze multiple projects and processes through a single system and interface. Individual managers can drill down to specific details easily, so they can respond confidently and quickly instead of trying to compare hundreds of different reports from third party systems and spreadsheets, so that you can be confident your data flows into better decision-making.

## Benefits to Teams & Leaders

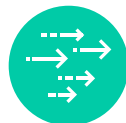

Leaders have immediate and total insight for a complete view of current IT portfolio status.

Enables transparency across all operational levels and a flexible integrated project plan.

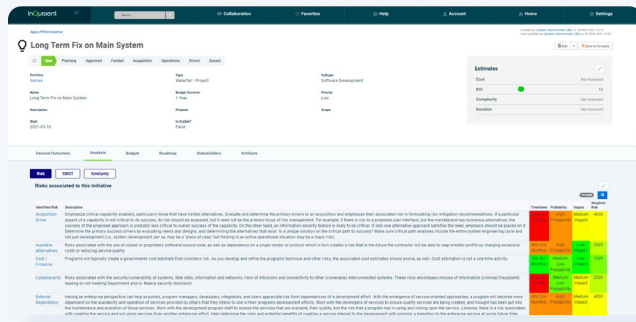

Real-time information and updates enable valuable timely alerts and risk mitigation, creating order from chaos.

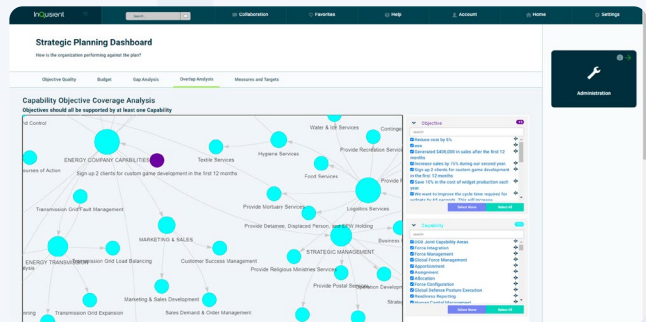

Ensures rapid collection of data from disparate sources with a clear chain of custody for collaboration and decision-making.

# Make intelligent decisions that are transparent and collaborative from anywhere the mission takes you.

Initiative Risk Assessment

Hybrid Portfolio Visualization

## Visibility

InQusient's IQ Portfolio Insight provides clear access to necessary information across all participants and activities and the ability to track changes made to that data. The platform's adjustable aperture enables critical data, assigned and secured by portfolio access levels, to be available to appropriate individuals across the organization. Due to its agile and flexible design, managers at any level within the portfolio can tailor the tool to meet the exact data capture needs of the individual project or even individual task within a project.

## Browser-Based Access

As part of a browser-based platform, IQ Portfolio Insight provides a web-based user interface accessible 24/7 that reflects real-time updates of essential data. This anywhere, anytime access enables users to interact with data collected for analysis, visualization and report generation whenever and wherever they need it.

## Security and Integrity

IQ Portfolio Insight provides optimal security and integrity of the data collected. A clear chain of custody, with multiple layers of configurable access, ensures the utmost integrity of information and direct visibility into who changed what when. Individual users are able to see the information they need without interrupting the flow of information within the database. In addition, ensuring data integrity mitigates costly risks associated with inaccurate data and allows the organization to allocate resources more efficiently.

## Patented Technology

We have had the same development team since the company's inception over 16 years ago. Our Platform has been created by these experienced technologists working together, with input and engagement from our long-term customers. This team has been awarded a number of patents for the integration of Web Technology and Databases that enable many of the advantages discussed above.

## Request Your Demo

Are you ready to do more with your data? Schedule a live demo with a member of our team to experience the power of the InQusient Platform for yourself. [info@inquisient.com](mailto:info@inquisient.com).

### About InQusient

InQusient is a comprehensive enterprise strategic planning and data management solution that unifies hybrid data integration and metadata management, enterprise architecture and technology asset management, portfolio and project management, risk modeling and process optimization in one easy-to-use platform.
