IQ Process Modeler

InQuisient

IQ Process Modeler helps enterprises gain understanding through visual representations and readily identify ways to improve business outcomes, drive efficiency, and gain a competitive advantage that lasts. Our Process Modeler tool is an intuitive, highly visual way to map out your strategy step–by–step in order to achieve precise implementation, set expectations and allocate resources accordingly. Ready to align your strategy and build a clearer path forward?

Align Your Data, Processes, and People

Built for Business Process Management (BPM), IQ Process Modeler is a powerful tool that creates a drawing that's also data which can be shared and linked to other data in other tools in the enterprise and the InQuisient Platform.

Use IQ Process Modeler to:

- Import and Export BPMN 2.0 compliant process models
- Create process model diagrams directly in the tool
- Identify BPMN (Business Process Model and Notation) Tasks with similarity overlap to Tasks in other process models
- Link Processes to the Capabilities they enable

- Link Processes to the Initiatives that modify them
- Trace each process to the Strategic Plan Objectives it supports
- Support Stakeholder review and analysis of each Model
- Track Process Maturity through a lifecycle

Meet Strategic Objectives.
Move Your Enterprise Forward.

IQ Process Modeler ensures processes are optimized for strategic objectives, maximizing technology resources and work for the people and teams making it all happen. Align processes to business goals. Easily share and communicate with others. Receive feedback in real–time. Get your whole team on the same page so you can move your enterprise forward.

What you can do with IQ Process Modeler
